

We have over 20 years of experience for manufacturing outdoor furniture.

Our company specializes in manufacturing outdoor furniture with over 20 years of experience. Our extensive OEM experience allows us to complete your design with just a simple drawing or picture.

The professional powder spraying line strictly controls the furnace temperature to ensure the stability of the product color and the adhesion of the powder. The diverse wood grain colors that are brushed by hand are the hallmark of our factory. The workers gently brush to create the ideal wood grain effect with aluminum, and the finished product is definitely thought to be natural wood if without you knocking and touching.

With decades of experience as a professional rattan knitter, our products are tight and naturally smooth. Our factory requires that products be woven with long rattan, with as few joints as possible, which slows down production, but greatly increases the strength and longevity of the product.

A perfect product also requires quality packaging, and we try to save our customers as much shipping space as possible while protecting the product perfectly. We do our best to save the shipping costs of our customers.

- **Rich OEM & ODM Experience**
- **Strict Quality Standards**
- **Professional Sales Service Team**
- **Competitive Price With Friendly MOQ**
- **Sample order is also welcome.**
- **Delivery On Time**
- **Quick Response**
- **Before & After Service**
- **One-Stop Service**
