DEVELOPMENT HISTORY

2000

Joint venture with Japan's foreign company Sanwa Co., Ltd. Established Yingkou Dongtai Plastic Products Co., Ltd.

2002

The company moved to Yingkou Economic and Technological Development Zone.

2006

The company moved to Yingkou High-tech Industrial Development Zone to build a new 20,000-square plant (North Plant).

2005

Established Yingkou Dongsheng Industrial Co., Ltd.

2010

Expanded scale of the company, built the south plant.

2011

Established PEB Division, Laughing Family Division, Trade Division, and Diatomite Division to lay the foundation of collectivization development.

2012

Established Yingkou City Xiaojiao Industry Co., Ltd., Yingkou Xiaojia Media Co., Ltd., Liaoning Dongji Technology Development Co., Ltd. Liaoning Dongtai Technology Development Co., Ltd., Changbai Dongtai Diatom Technology New Materials Co., Ltd. Group Management.

2013

The establishment of Liaoning Dongao Non-Metal Materials Development Co., Ltd. and the R&D Center of the Group was completed and put into use. The subsidiaries increased their capital and expanded their scale.

2014

2016

The first year of Liaoning TungSheng Group.

SPEECH OF CHAIRMAN

Dear Friends,

Thank you for choosing us! On behalf of all the staff, I'd like to express my appreciation to all the clients and friends who have trusted and supported us around the world!

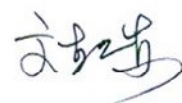

With the support and care of our clients and friends all over the world for many years, our company has grown into an all-around group company that including the manufacture of plastic packing production, import and export trade as well as the research of diatomite new environmental materials, four affiliated(branch)companies are located in Beijing, Inner Mongolia, Jilin, and Shenyang etc. We devote to the development of daily articles files all the time, we also accelerate neck to neck with the development of plastic and diatomite daily articles. With the development of 19 years, we have changed from traditional OEM factory into a leading group company who own an individual brand, and complementing of domestic and foreign trade, scientific and reasonable asset allocation as well as double industry development. We have realized inversed growth by creating the product, management and business mode, and IT application with industrialization as well as network business etc.

Today, I'd like to say thank you to all the clients that helped us in the past and the friends that might become our clients in the future. We will continue to make our effort, and return to our clients and friends with our good products and service. We will produce by heart, and it does not only show the reputation of our company, but also our belief, even our extending of life.

In the future, we will push forward the product technological development, constantly improve company management, actively take our social responsibility with "To create value for our staff, clients and investors; to devote ourselves for a better life and a cleaner world" as principle, and "Integrity, Responsibility, Gratitude, Acceleration, Innovation and Win-win situation" as our sense of value. To enter the capital market in 3 to 5 years as our target, and to pursue sustainable development strategy. We will continuously achieve the final goal of "becoming No.1 household producer in the world, the biggest import/export dealer and the leader of recycling economy in China". Thank you for your trust. Win-win situation is what we focus on, and prosperity is what we pursue. Our job is to make you feel relieved.

Wish you a propitious future and all the best.

Chairman: Wen Qidong

D2W degradation masterbatch will make ordinary plastic products begin to degrade into water in the natural environment after the service life of the reservation, carbon dioxide, and finally no longer plastic, and like the leaves in the land completely decompose and rot.

The product adding D2W is suitable for the following test standards:

- UK standard 8472
- US standard ASTM D6954
- Saudi Arabia standard 5009:2009
- France standard T51-808

·These bags are totally degradable D2W drawstring garbage bags.
 ·It is environmentally responsible, oxo-bio plastic can be re-used and recycled.
 Quite strong and do not tear easily as common drawstring trash bags.

Best sell flexible packaging and protective plastic cpe films

- Higher than the stiffness of the PE film
- Excellent moisture and odor barrier property
- Multi-function, can be used as a composite membrane.
- High gloss and transparency,low eutectic point,excellent heat sealability,thickness uniformity and surface flatness.

Applications:

- Coextruded Blown Film can be used either in tube form (e.g. for plastic bags and sacks) or the tube can be slit to form a sheet.
- Typical applications include Industry packaging container liners), Consumer packaging Laminating film Barrier filmfilms for the packaging of medical products, Agricultural film
- It is available customized for PE and is widely used in the field of daily necessities like raincoat,coverall,shower curtain;Hygiene products like medical surgical gown,pet cushion and Packaging like shipping bags, gift bags,file cover,computer cover and so on.

Best sell flexible packaging and protective plastic cpe films

High Temperature Resistance

Good Mechanical Adaptability

Moisture Resistance

Excellent Thermal stability

Diatomite Cup Mat

To improve the quality of indoor air condition. Diatomaceous has good performance in water absorbability, its special porous is more than 6000 times than charcoal, so diatomaceous has strong absorption water absorption, antibacterial, deodorant, mildew proof, anti-slip, purify the air, moisture proof, prevent the fungus and mites, heat resistant

Diatomaceous earth can make a variety of products, such as bath mat, foot mat, cup coaster, soap dish, flower pot tray, pan mat, etc.

- Non-calcined, take advantage of the morphological form of diatomite
- Exclusive 6.5 million tons of diatomite mine
- Three times adsorption, continuous absorption
- Tubular structure, rapid water absorption

Beautifully packaged with postcards and greetings from the grasslands.

Diatomite Bath Mat

Diatomite Bath Mat is made of ancient phyto plankton (diatomaceous) as raw materials with performance in absorbent, antibacterial deodorant, non-slip, so you won't have to worry about getting your floor wet after you come out of the bathroom any more .

It also has amazing water absorbing power and Non-slip function . The water on your feet can be quickly absorbed
